Whether you have a dog, cat, bird, or goldfish, you and your pet reverberate with chi, the mystic flow of life. FUR SHUI offers a serious but lighthearted overview of how we can easily improve the quality of life both for our furry (and nonfurry) friends and for ourselves. You'll learn that animals are full of natural energy and have a pervasive desire to provide emotional support to their caretakers. By understanding the simple principles in FUR SHUI, you'll immediately see that our pets have the power to improve our health, protect our homes, and commiserate with us on work, money, and love.
